

THE RECKLESS ABANDON IN WHICH WE LOADED GOLEMS AND DID NOT THINK ABOUT THE NECESSARY TESTING OF A PROPER UNLOADING PROCESS

ABOVE the timeline of great science lies a parallel timeline of great carelessness. From hobbyist necromancers to frontline scientists working in top-tier laboratories, a consistent standard of caution is exercised throughout. But I must explain to you how all this mistaken idea of denouncing pleasure and praising pain was born and I will give you a complete account of the system, and expound the actual teachings of the great explorer of the truth, the master-builder of human happiness. No one rejects, dislikes, or avoids pleasure itself, because it is pleasure, but because those who do not know how to pursue pleasure rationally encounter consequences that are extremely painful. Nor again is there anyone who loves or pursues or desires to obtain pain of itself, To take a trivial example, which of us ever undertakes laborious physical exercise, except to obtain some advantage from it? But who has any right to find fault with a man who chooses to enjoy a pleasure that has no annoying consequences, or one who avoids a pain that produces no resultant pleasure?

Desperation, pride, and fearlessness was what drove these scientists to sell at vero eos et accusamus et iusto odio dignissimos ducimus qui blanditiis praesentium voluptatum deleniti atque corrupti quos dolores et quas molestias excepturi sint occaecati cupiditate non provident, similique sunt in culpa qui officia deserunt mollitia animi, id est laborum et dolorum fuga. Et harum quidem rerum facilis est et expedita distinctio. Temporibus autem quibusdam et aut officiis debitis aut rerum necessitatibus saepe eveniet and golem hunters, a new occupation concerned with tackling this problem, was not—in fact—led by the institute's research team. It was their host town that caught note of the outbreak. It was these researchers' neighbors that cleaned up their failed experiments. As far as these researchers knew, their experiments were complete successes. As far as the neighbors knew, the scientists were unhelpful and naïve. Still, this relationship would persist for months on end, even after it became clear to the institute that the subject of their research had practically become common knowledge.
